

JavaScript

Branching & Looping

Branching in JavaScript

if – else if - else: same as Java

switch statement: same as Java

ternary operator: same as Java

Looping in JavaScript

while and do-while: same as Java

Standard for loops: same as Java

Enhanced for loops: two variants

For...of to iterate over the **values** of an **iterable** object (like an array)

For...in to iterate over the **keys** of an object
